

Terms and conditions for the use of geodata and geodata services provided by the State Agency of Environment, Nature Protection and Geology in Mecklenburg-Vorpommern (LUNG MV)

Rights of usage

The client is granted a simple, non-transferable right of usage according to § 31 (2) of the German Copyright Law and other laws for protecting intellectual properties. The user has to refer to the source of the data in every product generated using the retrieved data. A copyright notice has to be added to the product including, e.g. the name and the date of retrieval of the geodata used.

The client must secure that misuse of the data retrieved from LUNG MV is prohibited (e.g. by handling the access code and password with care). When integrating the Web Map- and Web Feature Services (WMS/WFS) from LUNG MV into an own geodata portal the owner has to add a link to the terms of use in an appropriate place.

The following applies to the “Kartenportal Umwelt MV” (<https://www.umweltkarten.mv-regierung.de/script/>):

All data as well as their representation in maps, pictures, texts, tables, diagrams are subject to Creative Commons CC BY-SA 3.0 (<http://creativecommons.org/licenses/by-sa/3.0/de/legalcode>). With any further processing the following source should be used

Source:

© LUNG MV (CC BY-SA 3.0)

Reproduction, distribution and publication - extracts included – allowed only with indication of the sources.

Data basis

The data basis for the data services is generated with utmost care. However, it is not possible to totally avoid errors when producing or providing the data or when supporting the services. So no warranty whatsoever can be given for the accuracy, completeness and actuality of the data. If more recent data or data in a different scale are superimposed, discrepancies may occur between the sets of data. The most actual version is always the valid one.

Availability of geodata services

Within the scope of its technical, personal and financial possibilities LUNG MV runs the geodata services permanently. There is no provision for particular fail-proof systems. LUNG MV reserves the right to adapt and develop the services in regard to technology and contents. This will not influence the performance of WMS/WFS for the users.

Liability

LUNG MV is liable for intentional or grossly negligent breach of duty in its area of responsibility. However, it can not take over liability for direct or subsequent damages caused by the access to or use of the WMS/WFS or by the temporal impossibility to access the service. LUNG MV does not have any responsibility to grant the technical functioning, the compatibility of the services provided with the user’s software and hardware or the absence of viruses and other threats.
