| <b>Beschreibung / Besonderheiten</b><br>Das feuchtes Dünenälchen mit seltenem Artenbestand liegt rund 550 m O Beobachtungsturm "Hohe Düne" innerhalb des großen, mehrreihigen großen Dünenkomplexes. Die Dünenabfolge ist hier vollständig ausgebildet. Es grenzen Graudünenrasen und Braundünen mit Heidekrautheide an. Auf dem feuchten bis sehr feuchten Sandboden sind Pionierrasen der Dünenälchen ausgebildet. Häufige Arten sind Strandsimse, Pfeifengras, Schilf und Einspelzige Sumpfsimse. Daneben treten Seltenheiten wie Baltische Binse, Zwerg-Lein und Strand-Mastkraut auf. Kleinflächig ist das Tälchen von der Dünen-Kriechweide besiedelt. |   |                                                                                                                                                                                                                                                                                                                                                                                                             |   |           |                                                                                                    |  |                                   |                                                                                                    |                                                                                                                                         |                                                                                                                                                                                                                          |                                                                                                                   |  |  |                                                                                                          |                                                                                                                                       |           |                                                                                                    |  |  |                                                                                                   |                                                                                                                                             |  |                                                                                                          |  |   |  |                                                                                                                                             |  |                                                                                                                                                                                                                                                                                                                                                                    |  |   |   |   |   |   |                                                                                              |   |                                                                                                                                                     |  |   |   |   |                                                                                                                                                      |  |   |   |   |                                                                                                                                                   |  |   |   |   |   |
