| <b>Beschreibung / Besonderheiten</b><br>Feuchtes, von einem Graben durchzogenes Großseggen-Ried in einer Senke liegend, umgeben von Ackerland. Westlicher Teil grenzt an einen Weiher.<br>Die Fläche wird von der Sumpf-Segge beherrscht. Im östlichen Teilbereich kommt die Steif-Segge zur Dominanz. Vorwiegend in den höher gelegenen Bereichen, meist am Rande der Senke zum Ackerland hin, kommt es zur Ausbildung von Rohrglanzgras-Röhricht. Überall zerstreut findet sich Sumpf-Reitgras, Land-Reitgras und Wasser-Schwertlilie.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                               |
