| D                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | H                                                                                                                                                                                                                      | M                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |   |                          |                                                    |   |                                    |   |   |   |   |   |   |   |   |   |   |   |   |  |  |  |  |                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                        |   |   |   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |   |   |   |   |   |   |   |   |   |   |  |  |   |  |  |  |  |                                                                                                                                                                                                                                                                                                      |  |  |  |   |   |   |   |   |   |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| <b>Beschreibung / Besonderheiten</b><br>Innerhalb der Ortslage Bastorf liegt auf vererdeten u. z. T. auch ungestörten sehr feuchten bis nassen Torfen ein Feuchtbrachenkomplex. Nur im N sind die Wiesen noch gemäht und eine Straße trennt den Biotopkomplex von dem Biotopkomplex 4015.<br>Mehrere schmale und flache Gräben durchziehen besonders im S den ungemähten, meist als Sumpfschilf ausgeprägten Teil des kartierten Gebietes. Im Randbereich der Gräben treten Hochstaudenfluren mit Weidenröschen und Mädesüß auf. In SW siedelt kleinflächig ein feuchtes Weidenbüsch.<br>Im O grenzt Schilfröhricht (Verlandungsröhricht) eines Torfstiches an, ansonsten prägen hauptsächlich Siedlungsbereiche die Umgebung.<br>Im N sind Schäden am Torfkörper auf Grund sehr tiefer Fahrspuren zu verzeichnen.                                                                                                                                     |                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |   |                          |                                                    |   |                                    |   |   |   |   |   |   |   |   |   |   |   |   |  |  |  |  |                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                        |   |   |   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |   |   |   |   |   |   |   |   |   |   |  |  |   |  |  |  |  |                                                                                                                                                                                                                                                                                                      |  |  |  |   |   |   |   |   |   |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
