| <b>Beschreibung / Besonderheiten</b><br>Gepflegte kleine nährstoffreiche Feuchtwiese an der nördlichen Seite des Münsters gelegen, Bestandteil einer vermoorten Bachniederung, die sich entlang der B105 in Richtung Osten zieht. Seggen, Wiesenfuchsschwanz und Mädesüß sind dominant. Am Rande des Biotops gelegene ehemalige Naß- und Feuchtwiesen sind jetzt entweder Schilfröhrichte oder Brennesselfluren und müßten wieder gemäht werden. Vegetationseinheiten kleinflächig verzahnt. |   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |   |                                                                                                                                                                      |                                                    |  |                                               |   |                                                                                                                                                                |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                         |  |   |   |   |   |   |   |   |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                       |  |   |   |   |   |   |   |   |
