| <b>Beschreibung / Besonderheiten</b><br>Feuchter, eutropher Bruchwaldkomplex mit einem Rasenschmielen-Weiden-Moorbirken-Erlenbruch und einem Sumpfreitgras-Moorbirken-Erlen-Weidenbruch. Randlich und im Übergang zum aufgelassenen Grünland (Biotop 0307-131-4028) sind Grauweidengebüsch angelagert. Die Baumschicht besteht deckend aus jungen bis ca. 4 Meter hohen Grau-Weiden mit zahlreichen Moor-Birken und Erlen. Die Krausschicht ist stark entwickelt und weist die typischen Arten dieser Bruchwaldtypen auf. Das Substrat besteht aus sehr feuchtem bis nassen, degradierten, eutrophen Torf. Stellenweise sind auch noch nasse Bruchwaldbereiche mit etwas Schwertlie (BAV) als Restart dieses Bruchwaldtypes vorhanden.                                                                                                                                                                                                                               |                                                                                                                                                                                                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |   |   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                                                                                                                           |                                                                                                                                                                                                                              |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |  |   |   |   |   |   |   |   |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |

Fortsetzung Beschreibung

Fortsetzung Pflanzenarten dominant ( unterstrichen: Art der Roten Liste MV, fett: Art der BArtSchV )

Fortsetzung Pflanzenarten zahlreich ( unterstrichen: Art der Roten Liste MV, fett: Art der BArtSchV )

Fortsetzung Pflanzenarten vereinzelt ( unterstrichen: Art der Roten Liste MV, fett: Art der BArtSchV )

 Lysimachia vulgaris  
 Peucedanum palustre  
 Scirpus sylvaticus  
 Vicia cracca

 Lythrum salicaria  
 Phalaris arundinacea  
 Scutellaria galericulata

 Mentha aquatica  
 Potentilla anserina  
 Stachys palustris

 Molinia caerulea  
 Rumex hydrolapathum  
 Urtica dioica
