| <b>Beschreibung / Besonderheiten</b><br>Verlandungsmoor westlich vom Kiebitzmoor bei Kanneberg in einer vermoorten Streckensenke der gestauchten Grundmoräne. Im nördlichen Teil des Moorkomplexes liegt die Restfläche des ehemaligen Kleingewässers, das die gesamte Fläche der Streckensenke einnimmt. Dieser Bereich wurde mit Luftbildcode versehen und ist nicht Bestandteil dieses Biotops. Der verlandete Bereich ist mit einem Flatterbinsen-Rohrglanzgrasröhricht bedeckt. Vereinzelt tritt am nördlichen Rand des Röhrichts ein ca. 2-3 Meter hohes Ohrweiden-Grauweidengebüsch mit vereinzelt jungen Moor-Birken, Stiel-Eichen, Holunder und Hasel hinzu. Die stark entwickelte Krautschicht weist deckend Rohrglanzgras und Flatterbinse auf. Das Substrat des Verlandungsmoores besteht überwiegend aus sehr feuchtem eutrophen, degradierten Torf mit Antorf.                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |   |   |                                                       |   |                                          |   |  |  |  |  |  |  |  |   |   |   |   |   |   |  |  |                                                                                                                                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                        |   |   |   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |  |   |   |   |   |   |   |   |   |   |   |   |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |  |  |  |   |   |   |   |   |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
