| <b>Beschreibung / Besonderheiten</b><br>Der Bruchwald ist aus einem verlandeten Gewässer entstanden und liegt im Nadelwald. Er stockt auf feuchtem Torf und ist von einem nassen Randsumpf umgeben. Ein Teil des Biotopes ist noch als offener Weiher mit Steifseggen-Bulten und Flatter-Binse ausgebildet. In der Krautschicht des Bruchwaldes sind Sumpffarn und Sumpf-Segge häufig zu finden. Das Biotop wird über einen Graben aus dem Weiher nach Norden entwässert.                                                                           |   |                  |   |                                                                                                                                                                                                                                                                                                                                                                                       |   |   |                                                                                                               |                                                                                                                                                                                                                                                               |   |                          |   |                                                                                                                                                                                                                                                                                                                                                                                                                  |   |                                                                                                                         |                                                                                                                         |   |   |   |   |   |   |   |  |  |  |  |  |  |  |  |  |  |             |  |  |  |                   |  |  |  |
