| <b>Beschreibung / Besonderheiten</b><br>Im Trebeltal östlich von Carlsthal und westlich vom Salinenmoor durch einen Entwässerungsgraben getrennte Kohldistel - Feuchtwiese, die nördlich und südlich durch Entwässerungsgräben begrenzt wird und westlich in Feuchtgrünland übergeht. Sie wird als extensive Mähwiese genutzt. Sie ist relativ artenreich und enthält u.a. Wiesen - Schaumkraut (Cardamine pratensis, RL-3 ), Kuckucks - Lichtnelke (Lychnis flos-cuculi, RL-2), Kammsegge ( Carex disticha, RL-3) und Gelbe Wiesenraute (Thalictrum flavum, RL- 2), Gliederbinse (Juncus articulatus), Pfennig - Gilbweiderich (Lysimachia nummularia) und Sumpfsimse (Eleocharis palustris).<br>Der entwässerte Moorkörper besteht aus sehr feuchten,degradierten, eutrophen Torfen.<br>Die Fläche wird sich nach der Renaturierung der Alttrebel naturnah entwickeln können. Eine extensive Bewirtschaftung wird empfohlen. Sie liegt in einem gemäß LIFE - Vertrag für eine Unterschutzstellung als NSG vorgeschlagenem Raum. |   |                                                                                                                                                                                                                                                                                                                                                                        |                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                                                                                                                                        |                                                                |   |                                                                                                                                                                                       |  |  |                                                                                                                                                                               |  |   |   |   |   |   |  |  |  |  |   |  |  |  |  |   |  |                                                                                                                                                                                 |                                                                                                                                                                                                                                                    |   |   |   |   |   |   |   |   |   |   |   |   |
