| H                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | X | A                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                       |   |                                                                                                                                  |                                                                                                                                            |   |   |   |                                                                                                                                            |   |                                                                                                                                                                                                                                                                                                                                                                        |   |   |   |   |   |                                                                                                                                                |   |   |   |   |   |                                                                                                                                                |   |   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |                                                                                                                                              |   |   |   |   |   |   |   |  |  |   |  |  |   |  |  |   |  |  |  |  |  |  |
| <b>Beschreibung / Besonderheiten</b><br>Feuchtwald mit verlandeten Torfstichen im Horst nördlich von Deyelsdorf, in dem Springkraut- Erlenbruch, Erlen- Lorbeerweiden- Grauweidengebüsch, Traubenkirschen- Erlen- Eschenwald, Brennessel- Grauweidengebüsch fließend ineinander übergehen. Im nördlichen Bereich ist ein Eschen- Erlenwald ausgebildet, der nordwestlich in ein Feuchtgebüsch übergeht. Sechs größere, flache Torfstiche liegen in der Fläche, die nördlich von einem Torfdamm und südlich durch einen tiefen Entwässerungsgraben begrenzt wird. Sie sind mit Schilfröhrichten, Sumpfseggenrieden und Schwertlilien- Kleinröhrichten sowie Grauweidengebüsch verlandet. Einige sind nur temporär wasserführend und deshalb zeitweise überwiegend vegetationslos. Die wenigen offenen Wasserflächen haben häufig eine Wasserfeder- Tauchflur. Der südliche Bereich ist durch einen farnreichen Springkraut- Erlenbruch geprägt. Die Fläche enthält u.a. Wasserfeder (Hottonia palustris, RL-3) und Gelbe Schwertlilie (Iris pseudacorus, BAV). Der Bereich ist durch direkte und großräumige Entwässerung gefährdet. Für seine Erhaltung wird eine Fortführung der bisherigen Nutzung bei reduzierter Entwässerung empfohlen. |   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                       |   |                                                                                                                                  |                                                                                                                                            |   |   |   |                                                                                                                                            |   |                                                                                                                                                                                                                                                                                                                                                                        |   |   |   |   |   |                                                                                                                                                |   |   |   |   |   |                                                                                                                                                |   |   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |                                                                                                                                              |   |   |   |   |   |   |   |  |  |   |  |  |   |  |  |   |  |  |  |  |  |  |
