| <b>Beschreibung / Besonderheiten</b><br>Zu Vegetationseinheiten: Braunwurz-Uferseggenried<br><br>Die nasse Quellflur liegt an einem kleinflächig nach Norden geneigten Flachhang am Übergang von Grundmoränenplatte zu einer vermoorten Schmelzwasserrinne. Angrenzend befinden sich Hochstaudenfluren und daran anschließend eine intensiv genutzte Mähwiese. Aufgrund der Lage am Rande der Grundmoränenplatte tritt hier großflächig und intensiv Quellwasser aus. In einer kleinen hangaufwärts gelegenen Fläche ist eine nährstoffärmerer Bereich mit Dominanz von Brunnenkresse auf einem schwankendem weichem und luftreichem Wasserkissen zu finden. Daran schließt sich hangabwärts eine sehr nasse Flatterbinsen-Berlen-Quellflur an, die kleinflächig offenes Wasser mit Wasserlinse aufweist. Am Unterhang liegt ein Uferseggenried, eine Waldsimsen-Quellflur, ein Rohrkolbenröhricht und ein Teichsimsenröhricht. Der gesamte Biotopbereich sowie die angrenzenden Hochstaudenfluren wurden aufgrund der intensiven Quellttätigkeit aufgelassen. |                                                                                                                                                                                                                        |   |   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |   |   |                                                                                                                                               |                                                                                                                                           |           |   |                   |   |   |                                                                                                                                            |   |   |                                                                                                                         |   |                   |   |   |   |      |                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                        |   |   |   |   |   |   |   |   |   |   |   |   |                                                                                                                                                                                                                                      |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |                                                                                                                                                                              |   |   |  |  |  |   |  |  |   |  |  |  |  |  |
