| <b>Beschreibung / Besonderheiten</b><br>Großes, schwach entwässertes Kesselmoor in Senke innerhalb des bewaldeten Sanders von Nadelwald und kleinflächig Laubmischwald umgeben;<br>Das Moor befindet sich gegenwärtig in einer Vernässungsphase mit beginnender Regeneration.<br>Auf feuchten bis sehr feuchten, wenig gestörten bis mäßig degradierten Torfen stockt ein mittelalter Torfmoos-Pfeifengras-Birken-Moorwald, der randlich bereits in einen Astmoos-Birken- bzw. Pfeifengras-Stieleichen-Birken-Moorwald übergegangen ist.<br>Die Freiflächen im zentralen und südlichen Bereich werden hingegen von einem Torfmoos-Flatterbinsenried auf nassen, wenig gestörten Torfen eingenommen.<br>Das Torfmoos-Seggen-Wollgrasried kommt kleinflächig eingestreut in der nördlichen Freifläche vor.                                                                                                                                                                                     |                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                                                                                                                                                             |   |                                                                                                                                                                                                                                               |                                                            |                                                                                                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                                                                                                                                                                                         |   |   |   |   |   |   |   |   |   |   |   |   |   |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |  |   |   |   |   |   |   |   |   |   |   |   |  |  |  |  |  |  |  |  |  |  |  |  |
