**Beschreibung / Besonderheiten**  
Feldbrache innerhalb der landwirtschaftlich genutzten Grundmoräne überwiegend von Acker und Staudenfluren umgeben.  
Staudenflur mit Mädesüß, Kohlkratzdistel und Wiesenplatterbse auf lehmig-torfigem Boden an einem begradigten Bach;  
Schilf-Landröhricht mit starkem Auftreten der Brennessel;  
Rohrglanzgras-Röhricht mit Kohlkratzdistel in Staudenflur übergehend.

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |   |   |   |   |   |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |  |  |  |  |  |  |  |  |  |  |  |   |   |   |   |   |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
