| <b>Beschreibung / Besonderheiten</b><br>In einer von Laubwald umgebenen Senke befindet sich auf eutrophen nassen und zzt. überstauten degradierten Torfen ein Mosaik aus einem lückigem Sumpfschilf-Sumpfschilf-Erlen-Bruchwald und Uferseggen-Riedern. Der Biotop ist nicht betretbar, es sind junge und mittelalte Sumpfwaldbereiche vorhanden. Das Mosaik Sumpfwald-Riede ist durch das Absterben der Erlen wahrscheinlich bei Wiederanstau entstanden. |   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                                                                                          |   |   |   |   |                                                                                                                       |  |   |   |   |   |   |  |  |  |  |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |  |   |   |   |   |   |   |   |  |  |  |  |  |  |  |  |  |  |  |  |                                                                                                                         |  |   |   |   |   |
