| <b>Beschreibung / Besonderheiten</b><br>Quellmoor im Hangbereich der End- bzw. kuppigen Grundmoräne, das zum See als nasser Wurmfarne-Erlen-Quellwald bzw. Brunnenkressen-Sumpfschilf-Erlen-Quellwald mit vielen Quell-Rinnsalen über nährstoffreichen, nassen wenig gestörten Torfen ausgeprägt ist. Landeinwärts grenzt das Quellgebiet an Ackerbrache und kleinflächig auftretenden Kiefern-Buchen-Mischwald, während es seewärts in den Bruchwald der Verlandungszone übergeht. |           |                                                                                                                                                                                                                                                                                                             |           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                                                      |     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |     |   |    |   |     |   |     |   |     |  |    |  |    |  |     |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |  |          |   |                    |   |   |   |   |   |   |   |   |  |  |  |  |  |  |  |  |  |  |  |  |
