| <b>Beschreibung / Besonderheiten</b><br>Größere vermoorte bzw. anmoorige Senke in den Endmoränen nördlich Eickelberg. Die ehemals wohl als Wiese oder Weide genutzte Fläche ist heute von Seggenriedern und Röhrichten sowie Feuchtgebüschungen eingenommen. Infolge des Verfalls der Gräben beginnen Flächen vor allem im Westen zu versumpfen. Es bilden sich flache Gewässer (periodisch) aus. In den Rieden sind nur noch vereinzelt Arten der Wiesen wie Rasenschmiele o. ä. vorhanden. Das Biotop wird im N, S und W von Acker begrenzt. Im Osten grenzen Brachflächen und Gehölz an. |   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |   |   |                                   |      |                                                                                                                          |                                                                                                                       |   |   |                                                                                                                                                                                                                                                            |   |   |   |   |   |   |   |   |   |   |                                           |   |   |  |  |  |  |   |  |   |   |  |                                                                                                                                                                                                                                                                                                                                                                                                                                           |   |   |   |   |   |   |   |   |   |   |   |   |                                                                                                                         |   |   |   |   |   |
