| <b>Beschreibung / Besonderheiten</b><br>Seggenried-Bruchwald-Komplex auf wiedervernässtem und ehemals landwirtschaftlich genutztem Verlandungsmoor mit kleinflächig aufgewachsenem Kesselmoor in Senke innerhalb der bewaldeten kuppigen Grundmoräne von Laubmischwald und kleinflächig Graben umgeben.<br>Auf sehr feuchten bis nassen, wenig gestörten Torfen und Antorf hat sich infolge der Wiedervernässung und damit verbundenen Nutzungsaufgabe ein zentrales Uferseggenried mit kleinflächig eingestreutem Erlen-Grauweidengebüsch entwickelt. Im Norden und Osten des Biotopes stockt dagegen ein mittelalter Großseggen-Erlenbruchwald, der zum Rand hin in einen schmalen Winkelseggen-Erlen-Eschenwald übergeht. Der Bereich des im Südosten gelegenen Kesselmoores war von den Entwässerungsmaßnahmen stärker betroffen und wird gegenwärtig von einem Pfeifengras-Stieleichen-Moorbirkenwald eingenommen. Eine ehemalige Niederwaldnutzung der Erle ist zu erkennen.         |                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |   |                                                                                           |                                                |                          |                                 |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |                                                                                                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                        |   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
