                                                                                                                                                                                                                                                                                                                                                                                                                                  |  |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| <b>Beschreibung / Besonderheiten</b><br>In einer flachen Senke hat sich auf feuchten bis sehr feuchten eutrophen degradierten Torfen eine artenarme Sumpfschilf-Feuchtwiese erhalten, welche z. T. schilfreich ausgebildet ist. Die Feuchtwiese ist wie die sie umgebene Fläche sehr kurz abgemäht worden.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                        |
