| <b>Beschreibung / Besonderheiten</b><br>In einer von Laubwald umgeben vermoorten Senke stockt auf feuchten vererdeten Torfen dieser Erlen-Bruchwald, dessen Bodenvegetation vor allem Flutschwaden prägt. Zahlreich kommen außerdem Großblütiges Springkraut und Brennnessel vor. Im Süden schließt kleinflächig ausgebildet ein Himbeer-Sumpfreitgras-Erlen-Bruchwald an. Großräumige Grundwasserabsenkung gefährdet langfristig gesehen diesen ohnehin schon gestörten (freigelegte Wurzelansätze aufgrund erheblicher Torfsackung) Bruchwaldbiotop. |   |                  |   |                                                                                                                                                                                                                                                                                                                                                                                                                                                               |   |           |                                                                                                                           |                              |   |   |   |                                                                                                                                                                                                                        |                                                                                                                                                |                                                                                                                        |  |                                                                                                                                                      |  |   |   |   |   |  |  |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                      |  |  |  |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                  |  |  |  |   |   |   |   |   |   |   |   |   |   |   |   |   |                                                                                                                                                          |  |  |  |  |  |  |  |  |  |  |  |
