| <b>Beschreibung / Besonderheiten</b><br>Das Gebiet ist ca. 900m westlich des Ortsrandes von Pinnow, am Südhang eines sandigen N-S-orientierten Hügels gelegen. Der oligotroph-saure und trockene Steilhang wird von dem Frauenhaarmoos-Rotstraußgras-Rasen bewachsen. Nördlich grenzt ein Ginstergebüsch an die Fläche, an den übrigen Seiten schließt sich aufgelassenes Grünland an. In der relativ artenreich ausgeprägten Magerrasen-Gesellschaft konnte mit dem Knotigen Mastkraut eine Art der Kategorie 2 der Roten Liste M-V gefunden werden. In der Gegend sollte eine Schafbeweidung stattfinden, so daß auch die beschriebene Fläche eine extensive Nutzung erführe. In diesem Zusammenhang könnten die Ginsterbüsche auf den Sandhügeln durch Entbuschung verkleinert werden. |   |                                                                                                                                                                                                                                                                                                                                                                                 |   |                                        |                                         |                                                                                                                                      |                                                                                                                                      |   |                                                                                                                            |   |   |   |   |  |  |                                 |  |                 |  |  |  |   |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                |  |   |   |   |   |   |   |   |                                                                                                                                                           |  |   |   |   |   |
