| <b>Beschreibung / Besonderheiten</b><br>Die Feuchtbrache befindet sich in einem Becken am Rande des Sumpfsees. Sehr feuchter bis nasser Lehm dominiert das Substrat und bildet eine ebene Oberfläche. Im Norden folgt auf das Biotop Schilfröhricht, im Süden setzt sich die Grünlandbrache mit degradierter Vegetation fort. Der größte Teil des Biotopes wird von einem Sumpfseggenried eingenommen.<br>Im östlichen Bereich des Biotopes haben sich landwärts Kohldistel-Hochstaudenfluren etabliert. Der östliche Ausläufer wird dagegen von einer Gliederbinsenflur geprägt. Sonst geht das Biotop landwärts in einen Weißstraußgrasflutrasen über. Im Biotop befinden sich Arten der Roten Liste: Zweizeilige Segge, Blaugrüne Segge, Moorlabkraut, Kuckuckslichtnelke, Sumpfdreizack und das Übersehene Reitgras wurden nachgewiesen. |  |                  |  |                                                                                                                                                                                                                                                                                                                                                                                                      |  |           |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |  |                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                         |  |                          |  |                       |  |  |  |  |  |
