| <b>Beschreibung / Besonderheiten</b><br>Verlandungsröhricht, vorwiegend bestehend aus Igelkolben, verzahnt mit Seggenriedern, Schilfröhricht und Rohrglanzgrasröhricht. Im Süden und Osten findet großflächige Verbuschung statt. In den nördl. Bereichen gibt es offene Wasserstellen, die z.T. mit Froschbiß-Decken bewachsen sind. Im Norden schließt sich eine Ackerbrache an, so daß der Biotop weitgehend störungsarm bleibt und wertvolle Lebensräume für Sumpf- und Wasservögel sowie für Amphibien bietet.                               |   |                                                                                                                                                                                                                                                                                                                                                                                 |   |                                                                                                                                                                                                                                                                                                                                                                                    |                                                |                                                                                           |                                           |   |             |                          |                                                                                                                                            |                                                                                                                                                                                                                        |   |   |   |   |   |                                                                                                                                      |   |   |   |   |                  |   |                                     |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                         |  |   |   |   |   |   |   |   |                                                                                                                                                           |  |   |   |   |   |  |  |  |  |  |  |  |  |  |  |  |  |                                 |  |                                    |  |
