| <b>Beschreibung / Besonderheiten</b><br>In den Wäldern südöstlich Devwinkel kommt in einer langgestreckten, schmalen Senke eine Torfmoos-Pfeifengras-Staudenflur vor. Der Standort ist feucht bis sehr feucht und mesotroph. Das Substrat ist Torf.<br>Im Nordteil der Senke kommt kleinflächig ein ausgestochener Bereich vor, wobei unklar ist, ob der Ausstich zum Zweck der Torfgewinnung vorgenommen wurde. Es handelt sich um eine jüngere Ausgrabung, die teilweise von einem Uferseggenried eingenommen wird. Das Gebiet wird großräumig entwässert, wodurch vermutlich auch diese Senke betroffen ist, die Entwässerung sollte deshalb möglichst eingeschränkt werden, wie die Senke entstanden ist, konnte nicht geklärt werden, möglicherweise ist sie anthropogener Herkunft.<br>Am Rand und teilweise in der Fläche kommen ältere und jüngere Fichten vor, die gepflanzt wurden oder sich ausgesamt haben. |   |                                                                                                                                                                                                                                                                                                                                                                                 |   |   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                          |                                           |   |   |   |   |   |   |   |   |   |   |  |  |  |   |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                                                                                             |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |  |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                             |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
