| <b>Beschreibung / Besonderheiten</b><br>Das Gebiet ist etwa 400m südöstlich vom Gehöft "Pölitzer Bauern" am N- und NO-Hang des Goldberges gelegen. Der Goldberg ist Bestandteil eines sandigen Osers (0406-421-4033). Angrenzend wachsen nitrophile Landreitgrasflure, im Süden grenzt eine strukturreiche Buschgruppe an. Der trockene, ziemlich arme und saure Sandstandort wird von einem artenreichen Thymian-Schafschwingel-Sand-Trockenrasen besiedelt, in den allerdings Ruderalarten wie Knaulgras und Honiggras sowie erste Sträucher, z.B. Schwarzdorn und Weißdorn einwandern. Durch die Nutzungsaufgabe droht eine Nährstoffanreicherung und Verbuschung. Durch Entbuschung und extensiven Weidegang von Schafen oder Ziegen kann der Verlust des regional sehr bedeutsamen Biotops entgegengewirkt werden. Die gesamte Erhebung, von der hier nur ein kleiner Teil kartiert wurde, besitzt den Schutzstatus eines FND (FND "Goldberg" Nr. 12). Dies lässt vermuten, dass zum Zeitpunkt der Ausweisung des Schutzgebietes, die schützenswerte Sandtrockenrasen-Vegetation noch eine größere Ausdehnung hatte. Die oben genannten Pflegemaßnahmen sind also dringend erforderlich. |   |                                                                                                                                                                                                                                                                                                                 |   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |  |  |   |   |   |   |   |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                    |  |   |   |   |   |   |   |   |   |   |   |   |
