| <b>Beschreibung / Besonderheiten</b><br>Das Gebiet liegt ca. 700m von Alt-Krassow auf bzw. an einem SO-exponierten Steilhang. Das quellige Komplexbiotop wird zwar unmittelbar von Grünland umgeben, nördlich allerdings findet in etwa 5m Abstand Ackernutzung statt. Direkt unterhalb des Gebietes befindet sich ein Graben. Die Fläche selber ist von reicher Trophie, die Wasserstufen variieren jedoch. Das Baldrian-Rispenseggen-Ried kann als naß eingestuft werden. Es befindet sich am Oberhang und wird von dem Quellwald umgeben, der wiederum als feucht bis sehr feucht einzuschätzen ist. Im Bereich des Unterhanges ist d. sehr feuchte Bachehrenpreis-Sumpfschilf-Ried anzutreffen. Es wird von dem Bachehrenpreis-Flutschwaden-Flur unterbrochen. Im NW ist das "nur" feuchte Brennessel-Sumpfschilf-Ried entwickelt. Eine Gefährdung des Gebietes ist derzeit nicht erkennbar.                                                                                                                                                                                                                                                                                                                                                 |                                                                                                                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |   |                  |                                                |           |                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                                                                                                                                                        |                          |  |                                                |                                                                                                                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                                                   |                                                                                                                                      |                            |                                                                 |   |                  |                                                                    |  |                      |                                                                        |  |                              |                                                                        |  |                                                                                                                                                                                                                                                                                                                                                                                                         |                                                             |   |                                         |                                                        |   |   |   |   |                                                                                                                                                           |  |   |   |   |   |  |  |  |  |  |  |  |  |  |  |  |  |                                                                                                                                                  |  |   |   |                                                                                                                                                         |  |   |   |   |   |
