| <b>Beschreibung / Besonderheiten</b><br>Ca. 1 ha großer Bruchwald von Grünland umgeben. Die Bodenschicht wird von Rasenschmielen dominiert. Es hat sich ein relativ dichter Unterstand aus jungen Eschen gebildet. Der Biotop wird von einem Randgraben umgeben, der z.T. mit Rispenseggen bewachsen ist.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
