| <b>Beschreibung / Besonderheiten</b><br>Von Ruderalflur umgebene Streckensenke. Der Biotop ist in einen Nord- und Südteil geteilt, diese sind über einen Graben, begleitet von entwässerten Rohrglanzgras-Staudenflur miteinander verbunden.<br>Der Nordteil ist ein verlandetes Kleingewässer, welches heute vollständig von einem dichten und artenarmen Sumpfschilf-Ried mit vereinzelter Steifschilf eingenommen wird. Der Südteil ist kleinflächig quellig, so kommt hier neben einem ebenfalls artenarmen Sumpfschilf-Ried, ein Sumpfschilf-Rispenschilf-Quellried an. Die Randbereiche sind zum Teil feucht und brennenselreich. Im Südosten genzt ein mittels Luftbild erfaßtes Gehölz kleinflächig an.                                                                          |                                                                                                                                                                                                                         |   |   |                                                                                                                                                                                                                                                                                                                                      |   |   |   |                                                                                                                                          |   |   |                                                                                                                                                                                                                                                                             |                          |   |   |                                                                                                                                        |                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                         |                                                                                                                                                                                                                                                                           |   |   |   |   |   |  |                                                                                                                                                                                                                                                                                                 |  |  |  |  |   |  |                                                                                                                                                                                                                                      |  |  |  |   |   |   |   |   |   |   |   |   |   |   |   |   |                       |  |  |  |
