| <b>Vegetationseinheiten</b><br>Sumpfschierlings-Großseggen-Ried (Sumpfschierlings-Fazies) (Vegetationsform 3 nach KOSKA in SUCCOW & JOOSTEN 2000)                                             |   | <b>Habitats + Strukturen</b>                                                                                                                                                                                                                                                                                                                                                    |   | <b>Beschreibung / Besonderheiten</b><br>Das Gebiet liegt 2,7 km nordöstlich des Zentrums von Gnoien. Es befindet sich südlich der Warbel, in ihrem Tal. Im Süden trennt ein Fanggraben das Gebiet vom Talrand, westlich und östlich liegt Grünland hinter den Gräben, nördlich grenzt das Gebiet an Ruderalfluren bzw. direkt an die Warbel. Der größte Teil ist aufgrund des noch zügigen Entwässerungssystems lediglich der Wasserstufe 3+ zugehörig. Im Zentrum und in den verwachsenen Gräben findet sich die Wasserstufe 4+ und einem kleinen Nordwestteil 5+. Die Trophie ist eutroph reich, in den sehr feuchten und nassen Bereichen auch kräftig. In diesen Bereichen dominiert die Sumpfschierle. In den trockeneren tritt z.T. Brennnessel hinzu. Hier übernimmt z.T. Rohrschilf die Herrschaft. Am Talrand spielt Waldsimse eine größere Rolle, was auf Quelleinfluß hindeutet. |                                          | <b>Wertbestimmende Kriterien</b>                                                          |              |                                               |             |                                               |            |                                    |                  |                               |                  |                                                                                                                                                                                                                        |  |  |  |  |  |   |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                         |  |   |   |   |   |   |   |   |                                                                                                                                                           |  |   |   |   |   |  |  |  |  |  |  |  |  |  |  |  |  |                                                                                                                                               |  |   |   |   |                                                                                                                                                         |  |   |   |   |   |
