| <b>Beschreibung / Besonderheiten</b><br>Das Gebiet liegt etwa 1,4km östlich von der Ortsmitte Sukow, innerhalb der zwischen Sukow und Klein Markow gelegenen Niederung, nördlich eines Torfstiches gelegen. Das umgebende Niedermoor wird stark entwässert, hier jedoch, in diesem tiefergelegenen Bereich (Flachabtorfung) konnten moortypische Pflanzenarten noch überleben. Das Torfsubstrat ist reich an Nährstoffen. Mehr als 2/3 der Fläche sind naß. Sie befinden sich im Zentrum und werden von einem Großseggen-Grauweiden-Gebüsch bedeckt, welches westlich von zwei kleinen Bereichen den Wasserlinsen-Sumpfschilf-Riedes flankiert wird. Im Nordwesten ist ein kleinflächiges, nur feuchtes Rasenschmielen-Grauweiden-Gebüsch zu finden. Im Südosten hingegen existiert ein sehr feuchtes Nachtschatten-Schilf-Röhricht. Im Nordosten wird ein sehr feuchtes Sumpfschilf-Ried locker von Esche überschirmt. Eine Gefährdung des Biotops besteht nicht.                       |                                                                                                                                                                                                                        |                  |   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |   |   |                                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |   |                          |   |   |   |   |   |   |   |                                                                                                                                                     |  |  |                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                        |   |   |   |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |  |  |  |   |   |   |   |   |   |   |   |   |   |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
