| <b>Beschreibung / Besonderheiten</b><br>Nördlich des Kerbtalbaches im Uposter Gehege gelegenes Feuchtbiotop aus einem Mosaik von Sumpfschilf-Schilfröhricht und Schilf-Grauweidenbüsch. Das Substrat besteht aus stellenweise quelligem aber überwiegend nassen bis sehr feuchten, eutrophen wenig gestörtem und degradierten Torf. In der weiteren Umgebung befindet sich südlich der Kerbtalbach (Biotop 6) und nördlich der Wald des Uposter Geheges. Der Abschnitt wird nicht genutzt.                                                           |   |                                                                                                                                                                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |   |                                                                                                                                                                                     |  |   |   |   |   |   |   |   |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                    |  |   |   |   |   |   |   |   |   |   |   |   |
