| <b>Beschreibung / Besonderheiten</b><br>Etwa 1,3 km südwestlich von Borrentin befindet sich ein Ausschnitt des Borrentiner Oszuges, der in seiner Morphologie vergleichsweise noch wenig gestört und im wesentlichen mit einem artenarmen ruderalen Glatthaferassen mit Arrhenatherum elatius als aspektbildender Art bedeckt ist. An einigen Stellen haben sich Reste eines Schwingel-Rasens erhalten. Die derzeitige Vegetationsdecke allein rechtfertigt wohl nicht eine Erfassung als geschütztes Biotop. Sie wurde vor allem wegen des relativ gut erhaltenen Abschnittes des Oszuges und der durchaus noch möglichen Rückführung des Glatthafer-Rasens in einen Halbtrocken- bzw. Sandmagerrasen durch Wiederaufnahme einer extensiven Beweidung vorgenommen.<br><br>Am Nordrand stehen einige jüngere Silber-Weiden.                                                                                                                                     |                                                                                                                                                                                                                          |                                                                                                                                                                                                                                                                                                                                      |   |   |                                               |  |                                                                                                                                                                                                                            |                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                          |  |                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                          |   |  |  |                                                                                                                                                                                                                                                |  |  |  |  |  |                                                                                                               |  |   |   |                                                                                                                        |  |                                                                                                                                                                                                                                                                                                              |   |   |   |   |   |   |   |   |                                                                                                                          |  |   |   |   |   |
