| <b>Beschreibung / Besonderheiten</b><br>In einem relativ kleinen Laubwaldgebiet bei Ritzerow befindet sich ein größerer Niedermoorbereich, welcher in der Vergangenheit ausgetorft wurde. Danach entwickelte sich ein Bruchwald auf diesem eutrophen, meist feuchten Torfstandort. Obwohl die Bedingungen noch feucht sind, zeigen die Torfe stellenweise deutliche Degradierungserscheinungen, großflächig ist ein Frauenfarn-Rasenschmielen-Erlenbruchwald zu finden, welcher in den Randbereichen in einen degradierten Brennnessel-Erlenwald übergeht. In kleinflächigen Vernässungsflächen kommt Sumpfschmielen in der Krautschicht hinzu (Rasenschmielen-Sumpfschmielen-Erlenbruchwald). Nennenswerte Entwässerungsgräben konnten in der Fläche selbst nicht gefunden werden. Allerdings ist die gesamte Umgebung von einer großräumigen Entwässerung betroffen. Nur vereinzelt sind in der Baumschicht Birken zu finden, Esche kommt als Jungwuchs stellenweise vor. |                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                               |                       |                                                |                                          |                            |                                        |                  |                                           |                      |                                               |                                                                  |                                               |                                |                                    |                                         |                               |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |  |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |
