| <b>Beschreibung / Besonderheiten</b><br>Überwiegend von Laubwald umgeben, befindet sich in einer bachbegleitenden vermoorten Senke ein zzt. überstauter mittelalter Sumpfseggen-Erlen-Bruchwald. Aufgrund der Mehrstämmigkeit der Erlen kann von einer ehemaligen Niederwaldbewirtschaftung ausgegangen werden. Im nördlichen Biotopteil ist der bruchwaldbegleitende Bach naturnah ausgebildet (geschwungen bis gestreckter Bachlauf, gemächlich fließend mit Torf und Schlamm im Bachbett), obwohl er als begradigter Bach in den Biotop hineinführt und auch im südlichen Biotopteil begradigt ist (kleinflächig als Wegedurchlass verrohrt (FBR < 1 %) und als begradigter Bach den Biotop verlässt. Nahe des Baches ist teilweise auch ein Brunnenkressen-Erlen-Quellwald ausgebildet (mit Sumpfsegge bzw. Rasenschmiele) und am Westrand befindet sich ein Sumpfseggen-Grauweiden-Feuchtgebüsch. |           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                        |                                                                                                                                                                                                                                    |                                                                                                                                                                                                                              |   |   |   |   |   |   |   |  |  |  |                                                                                                                                                                                                                                              |  |   |   |   |   |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |  |   |   |   |   |   |   |   |   |   |   |   |   |   |  |  |  |  |  |  |  |  |  |  |  |  |
