| <b>Beschreibung / Besonderheiten</b><br>Das Biotop liegt auf einer Polderfläche nördlich der Peene. Der westliche Rand wird extensiv beweidet und ist vom ungenutzten Ostteil durch einen Zaun getrennt. Östlich des Biotopes verläuft ein Graben. Westlich und nördlich schließt sich extensiv beweidetes Grünland an. Im SO ist ein Schilfröhricht zu finden. Der Standort ist eutroph, überwiegend sehr feucht und vorherrschendes Bodensubstrat ist degradierter Torf. Auf dem beweideten Westteil des Biotopes hat sich eine Sumpfschachtelhalmschilf-Zweizeilenseggen-Feuchtwiese ausgebildet. Der Sumpfschachtelhalm erreicht recht hohe Deckungen. Wichtige Begleiter sind die Kuckuckslichtnelke (RL 2), das Weißstraußgras, das Honiggras, der Kriechhahnenfuß, das Gänsefingerkraut, die Wiesenplatterbse sowie das Wiesenlieschgras. Nach Osten schließt sich jenseits des Zaunes ein dicht geschlossenes Kohldistel-Sumpfschachtelhalmschilf an. Die Wuchshöhe der Seggen ist größer als 1 m. Die Sumpfschachtelhalmschilf dominiert. Typische Begleiter sind die Blaugrüne Binse, Gilb- und Blutweiderich, Rasenschmiele, Wasserröhricht und einzelne Rispenseggen. Am Graben im Osten ist ein Schilf-Zweizeilenseggenried ausgebildet. Es verläuft als schmales Band am Graben entlang. Die Rispenseggen tritt hier häufiger auf. Auch Arten wie die Stumpfblütige Binse (RL 3), das Moorlabkraut (RL 3) sowie sehr seltene Exemplare des Schlangenknotens (RL 2) konnten hier gefunden werden. Das Biotop wird durch den angrenzenden Entwässerungsgraben negativ beeinflusst. Es liegt im LSG Unteres Peenetal. |   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |   |                                                                                                  |                                                                                                                                                                                                                        |   |                                                                                      |                          |                                                                                                |   |   |   |                                                                             |   |   |   |   |   |  |  |  |  |  |  |  |  |  |  |                                                                                                                                                                                              |  |   |   |   |   |   |   |   |   |   |   |   |   |   |                   |  |
