|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                               |                          |                                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |   |   |                                               |   |   |   |                                          |   |  |                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |  |  |  |   |                                                                                                                                          |   |   |  |  |   |                                           |                                                                                                                                                                                            |                          |                       |                          |                                  |                          |                                          |                          |                            |   |                                        |                          |                  |                          |                                           |                          |                      |                                                                                                                                                                                                                                      |                                               |                          |                              |                          |                                               |                          |                                |                          |                                    |                                           |                                         |                          |                               |                          |   |   |                                                                                                                                                                                                                                            |  |  |  |   |   |   |   |   |   |   |   |   |   |   |   |   |
| <b>Beschreibung / Besonderheiten</b><br>Großseggenreicher Feuchtwiesenrest in einem vermoorten Seitental der Peene westlich Groß Toitin. Es dominieren Sumpfschilf und Zweizeilensegge. An den Grenzen des Biotops finden sich Übergänge zu gestörtem Feuchtgrünland bzw. Saatgrasland ohne Feuchtheizer. Die Biotopfläche ist einer von mehreren Feuchtwiesenresten im durch Entwässerung stark beeinträchtigten Talraum. Der gesamte Talraum, so auch die Biotopfläche wird als Wiese offenbar extensiv genutzt. Im Westen grenzt ein Entwässerungsgraben an, ansonsten ist die Biotopfläche von Grünland umgeben. Im Osten grenzen einzelne Weidengebüsche an. In der Biotopfläche verläuft ein naturnaher Grabenabschnitt.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                                               |                          |                                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |   |   |                                               |   |   |   |                                          |   |  |                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |  |  |  |   |                                                                                                                                          |   |   |  |  |   |                                           |                                                                                                                                                                                            |                          |                       |                          |                                  |                          |                                          |                          |                            |   |                                        |                          |                  |                          |                                           |                          |                      |                                                                                                                                                                                                                                      |                                               |                          |                              |                          |                                               |                          |                                |                          |                                    |                                           |                                         |                          |                               |                          |   |   |                                                                                                                                                                                                                                            |  |  |  |   |   |   |   |   |   |   |   |   |   |   |   |   |
