| <b>Beschreibung / Besonderheiten</b><br>In einer Versumpfungsmoorsenke inmitten eines geschlossenen, großen Laub- und Mischwaldgebietes hat sich ein lichter, einheitlich wirkender Wasserfeder-Erlensumpf mit Flachwasser und geschlossener Wasserlinsen-Schwimmdecke ausgebildet. Die mittellalten Erlen stehen auf Bulten. Entwässerungsgräben wurden nicht beobachtet. |  |                  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                             |  |       |  |                                                                     |  |                                                                                                                                                                                                                                                                                                |  |                   |  |                          |  |  |  |
