| <b>Beschreibung / Besonderheiten</b><br>In einer vermoorten und leider entwässerten Senke ca. 500m südlich von Wolde hat sich ein Uferseggenried eingestellt, in das vom Rand Brennesseln hineindrängen. Den Untergrund bildet ein wechselfeuchter, eutropher degradiertes Niedermoortorf. Das Seggenried ist von einer Hochstaudenflur umgeben und liegt in einer Ackersenke, die am Nordrand von einem Graben entwässert wird. Das Biotop wurde wahrscheinlich früher als Wiese genutzt. |   |                                                                                                                                                                                                                                                                                                                                                                                                                             |   |                                                                                                  |                                                                                                                                                                                                                        |   |                                                                                      |                                                  |                                                                                                |   |   |   |                                                                             |   |                                                               |   |   |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                      |  |   |   |   |   |   |   |   |   |   |   |   |   |   |                   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
