| <b>Beschreibung / Besonderheiten</b><br>Bei diesem Sumpfschilf-Korbweidengebüsch handelt es sich wie bei Nr. 4045 um eine ursprünglich als Straßen- und Uferschutz angelegte Pflanzung. Allerdings wird diese zusätzlich noch durch die sehr gut entwickelte, naturnahe Krautschicht und die z.T. schon ältere Überhälter aus Bruchweide, Moorbirke und Schwarzerle gekennzeichnet. Im Südosten befindet sich ein Sumpfgänsedistel-Sumpfschilf. Vor ca. 10 Jahren war die Fläche im Süden noch etwas größer (vgl. CIR-Luftbild). Durch den Bau eines Radweges (Erweiterung des Brückendamms) sowie des Schotterweges wurde hier ein Teil überbaut. |   |                                                                                                                                                                                                                                                                                                                                                                 |                                                                                                    |   |                                                                                                                                                                                                                            |                                                                                                     |                                    |                                                                                                   |                                                                                                                                         |   |                                                                                                    |                                                                                                         |  |   |                                                                                                                                |  |   |   |   |   |  |  |  |                                                                                                                                                                                                                                                 |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                    |  |   |   |   |   |   |   |   |                                                                                                                                                     |  |   |   |   |                                                                                                                                                   |  |   |   |   |   |
