| Moorwald auf meliorativ beeinträchtigtem Kesselmoor in Senke innerhalb der bewaldeten Sandebene von Nadelwald umgeben. Auf feuchten bis sehr feuchten, mäßig degradierten Torfen hat sich infolge der hydrologischen Beeinträchtigung ein mittelalter Moorwald der Sauer-Arm Moore bzw. Sauer-Zwischenmoore in der Ausbildung als Trunkelbeer-Kiefern-Birkenmoorwald mit vorherrschendem Sumpfporst bzw. Torfmoos-Pfeifengras-Birkenmoorwald herausgebildet. Durch den Moorwald hindurch verläuft ein Entwässerungsgraben. Aus floristischer Sicht verdient neben dem Vorkommen von Trunkelbeer-Kiefernmoorwald und Torfmoos-Birkenmoorwald als gefährdete Pflanzengesellschaften auch das zahlreiche Auftreten des Sumpfporstes sowie der Moose Aulacomnium palustre und Sphagnum rubellum besondere Beachtung. |   |                                                                                                                                                                                                                                                                                                                                                                                 |                                                                                                                                                   |           |                                                                                                                   |  |                                                                                                                                           |                                                                                                                                                   |                                                                                                                                                   |   |   |   |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |  |   |   |   |   |   |   |   |  |  |  |  |  |  |  |  |  |  |  |  |                                                                                                                                                     |  |   |   |   |   |
