| <b>Beschreibung / Besonderheiten</b><br>Zum Südteil des Waldgebietes "Dohlen" gehört, an Laub- und Nadelholzbestände grenzend, in einer lang gestreckten Senke gelegen, dieses meso- schwach eutroph-saure Kesselmoor, das in den letzten Jahren einen erheblichen Anstieg des Wasserstandes erfahren hat. Das ehemalige mesotroph-saure Zentrum nimmt heute keinen großen Anteil mehr ein. Es wird durch Torfmoos-Birkengehölze mit Sumpfcalla im Süden und Sumpfreitgras im Norden bestimmt. Gehölzfreie Bereiche im Moorzentrum weisen auf Nährstoffanhebungen hin. So bildet z. B. Walzensegge im Nordteil zusammen mit Torfmoosen und Sumpfcalla dichte Riede. Im Bereich des Randsumpfes haben sich am Südostrand Sumpfcalla-Schnabelseggen-Riede entwickelt. Ansonsten ist der Randsumpf breit und abgesehen von Wasserlinsendecken vegetationslos. Den Hauptanteil am Biotop nehmen dichte Schwingrasen aus Sumpfcalla ein, die allmählich zur Verlandung der neu entstandenen Wasserflächen führen. Ihre größte Ausdehnung besitzen sie im Mittelteil der Moorsenke.                                                                                                                                                                                                                                                                                                                                                   |                                               |                                     |                                        |                                                                                                                                                                                                                                                                                                                                                                                                       |   |                    |   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |   |                   |                                                                                                                                                                                                                                                                                            |           |  |           |  |    |  |     |  |     |   |                                                                                                                                                                                                                                                                                        |   |    |   |          |   |                          |                       |                          |                                  |                          |                                                                                                                                                                                                                                                                                           |                          |                            |                                     |                                        |                                                                                                                                                                                                                                      |                  |                          |                                           |                          |                      |                                                                                                                                                                                                                                                                                        |                                               |                                     |                              |                          |                                               |                          |                                |                          |                                    |                          |                                                                                                                                                                                                                                                                                          |                          |                               |                          |   |   |   |   |   |   |   |   |   |   |   |   |   |  |  |  |  |  |                                                                                                                                                                                                                                                                                                |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
