|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |   |                  |                                                    |  |                                   |                                                                                                                                             |                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                        |  |  |                                                                                                                                                   |  |                                                                                                                                                                  |  |  |  |  |   |                                                                                                                                               |  |   |   |   |  |  |                                                                                                                                                                                                                                                                                                                                                                                |  |   |   |   |   |   |   |   |                                                                                                                                                           |  |   |   |   |   |
| <b>Beschreibung / Besonderheiten</b><br>Im ehemaligen Grenzbereich entwickelter Heidekraut-Bestand auf mäßig trockenem, mesotrophem Sand und kiesigem Sand. Drahtschmiele und Wolliges Honiggras wandern in die Zwergstrauchheide ein. Kiefernverjüngung, die z.T. eingeht, ist auf der Biotopfläche vertreten. Der Biotop grenzt im Süden an Weg im Norden, Westen und Osten an Kiefern-Kultur. Auf der Biotopfläche befindet sich in Wegnähe ein Holzpolter. Die Fläche sollte der natürlichen Entwicklung zum Wald überlassen werden.                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |   |                  |                                                    |  |                                   |                                                                                                                                             |                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                        |  |  |                                                                                                                                                   |  |                                                                                                                                                                  |  |  |  |  |   |                                                                                                                                               |  |   |   |   |  |  |                                                                                                                                                                                                                                                                                                                                                                                |  |   |   |   |   |   |   |   |                                                                                                                                                           |  |   |   |   |   |
