| <b>Beschreibung / Besonderheiten</b><br>Zur als Grünland genutzten Boizeniederung nördlich von Gresse gehört auf feuchten - sehr feuchten vererdeten Torfen dieser schlankseggenreiche Feuchtwiesenabschnitt. Er ist von entwässertem Grünland umgeben und die zahlreichen zur Boize hin entwässernden Gräben innerhalb der Niederung führen zur Ausbreitung von Störzeigern innerhalb der Feuchtwiese. Neben Schlanksegge prägen auch Rohrglanzgras, Kriechender Hahnenfuß und Wiesenfuchsschwanz den Wiesenaspekt. Arten wie Kuckuckslichtnelke und Wiesenschaumkraut sind noch sporadisch vertreten. Zum langfristigen Erhalt der Feuchtwiese sollte die Entwässerung eingeschränkt werden.                                                                                                                     |                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |   |   |                                   |                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                                                  |                                                                                                                                                                                             |  |  |   |   |                                                                                                                                                                                                                                                                                                                                                                                                                                                            |   |   |   |   |  |  |  |  |   |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |   |   |   |   |   |   |   |   |   |   |   |  |  |  |  |  |  |  |  |  |  |  |  |
