|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                                                                                                                                                                       |                  |   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |   |   |                                                    |   |   |   |                                   |   |                                                                                                                                                 |                          |                                                                                                                                                                                                                                      |   |  |  |  |                                                                                                                                                                                                                                  |  |                                                                                                                                                       |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                                                                                                                                                                                                                                                                                                                                                                                                       |   |  |  |                                                                                                                                                       |  |  |  |  |                                                                                                                                                                                                                                                                                           |  |  |  |  |  |  |  |                                                                                                                                                                                                                                      |  |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |                                                                                                                                                                                                                               |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |
| <b>Beschreibung / Besonderheiten</b><br>Im Bereich der ehemaligen Staatsgrenze ausgebildete Silbergras-Pionierflur auf kiesigem, mäßig trockenem oligo-mesotrophem Sand. Die Silbergrashorste verbindet eine dichte Moosschicht aus Behaartem Widertonmoos, vereinzelt gehören auch Bauernsenf und Jasione dazu. Kleinflächig unterbrechen Heidekraut-Flächen und Jasione-Rotstraußgras-Rasen die Pionierflur. Auch zahlreiche Kiefern und Birkenverjüngung findet sich auf der Fläche. Grasreiche frische Ruderalflur umgibt den langgestreckten (ca 800 m langen) Biotop.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                                                                                                                                                                                                                                                                                                                                                                                                       |                  |   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |   |   |                                                    |   |   |   |                                   |   |                                                                                                                                                 |                          |                                                                                                                                                                                                                                      |   |  |  |  |                                                                                                                                                                                                                                  |  |                                                                                                                                                       |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                                                                                                                                                                                                                                                                                                                                                                                                       |   |  |  |                                                                                                                                                       |  |  |  |  |                                                                                                                                                                                                                                                                                           |  |  |  |  |  |  |  |                                                                                                                                                                                                                                      |  |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |                                                                                                                                                                                                                               |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |
