|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                                                                                                                                               |                                                                                                                                  |   |                                   |                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                                   |                                                                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |   |   |   |   |   |   |   |   |  |  |  |  |   |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| <b>Beschreibung / Besonderheiten</b><br>In einer Senke gelegener, zu Zeit der Aufnahme überstauter Erlen-Bruchwald auf vererdetem Torf und Antorf. Die lückige Krautschicht wird durch Flutenden Schwaden bestimmt. Vereinzelt sind Sumpf-Labkraut, Sumpf-Haarstrang und Wiesensegge beigemischt. Auf den höher gelegenen, nicht von Wasser überstauten Randbereichen, stockt ein Sumpfreitgras-Erlen-Bruchwald. Der mehrstämmige Wuchs der Erle weist auf eine Niederwaldnutzung hin. Am Nordwestrand befindet sich ein Nachtschatten-Schilf-Wasserröhricht im Bereich eines ehemaligen Kleingewässers. Im Norden vom Acker kommend, scheint ein Rohr zeitweise den Bruchwald mit Wasser zu speisen. Direkt umgibt den Biotop ein Himbeer-Birkenwald an den sich dann erst im Norden, Westen und Osten Acker anschließt. |                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                                                                                                                                               |                                                                                                                                  |   |                                   |                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                                   |                                                                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |   |   |   |   |   |   |   |   |  |  |  |  |   |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
