| <b>Beschreibung / Besonderheiten</b><br>Auf einem kleinen Binnendünenrücken ist von Kiefern- und Eichenwald umgeben eine Silbergras-Flur auf oligo-mesotrophem, mäßig trockenem Sand ausgebildet. Silbergras ist dabei mit Rentierflechte und Sandsegge vergesellschaftet. Am beschatteten Ostrand bildet Sandsegge zusammen mit Kleinem Sauerampfer auch dichte Rasen. |   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |   |                  |                                                      |  |                                                                                                                                                                                                                                           |   |                                                                                                                                                                |  |   |   |   |   |  |   |  |  |  |  |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |  |   |   |   |   |   |   |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
