| <b>Beschreibung / Besonderheiten</b><br>Vermoorte Rinne innerhalb eines geschlossenen Waldgebietes südwestlich der Deponie Schelfwerder. Geschlossenes, relativ artenarmes, aus Sumpf-Segge und Ufer-Segge aufgebautes Ried auf feucht bis sehr feuchtem moorigen Standort. Ehemaliger lichter Eschenwald, dieser größtenteils abgestorben. Durchmesser der Stämme zwischen 10 und 30 cm. Einzelne jüngere, noch vitale Schwarzerlen stocken zumeist randlich der Fläche. Zentral wird die Fläche von einem Graben durchschnitten.,                                                                                                                                                                                                                                                                                                                                                                                                                      |                                                                                                                                                                                                                          |                                                                                                                                                                                                                                                                                                                                                                                             |   |   |                                                         |   |                                                                                                                                                                                                                                                                                                                                      |                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |   |   |                                                                                                                                                                                                                                                                                                                                   |  |                          |  |                                                                                                                                                  |                                                                                                                                                                                                                                                                                                                                                         |   |   |                                                                                                                                                         |  |   |   |   |   |  |  |                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                                                                                                                                                                |   |   |   |   |   |   |   |   |                                                                                                                                                           |   |   |   |   |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
