| <b>Beschreibung / Besonderheiten</b><br>weitere Vegetationseinheiten unter 1%: OVW<br><br>Heterogen strukturierter Trockenrasen am Nordöstlichen Rand des alten Schießplatz Göhrener Tannen. Es handelt sich um ehemaliges Abstandsgrün zwischen Gebäuden des alten "Kommandostandes". Dieser ist inzwischen abgerissen (Rohbodenbereich ausgegrenzt). Es hat sich eine relativ artenreiche, vielfältige Vegetation angesiedelt, die überwiegend aus Arten der Trockenrasen aufgebaut ist. Der Flächenanteil der Störungszeiger an der Vegetationsdecke liegt bei 10 - 15%. Die Sandheide tritt zwar eingestreut relativ häufig auf, wurde aber insgesamt als Teil der Trockenrasen aufgefaßt.<br>Der Trockenrasen setzt sich auch nördlich einer schmalen Betonstraße bis zum Fährweg fort. |   |  |   |   |  |   |  |   |  |   |   |   |   |   |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |   |   |   |   |   |   |   |   |   |   |  |  |   |   |   |   |
