| <b>Beschreibung / Besonderheiten</b><br>Sehr kleine Feuchtwiesenbrache, die von drei Seiten von Wald umgeben ist südwestlich Setzin. Trotz ihrer geringen Größe weist sie eine relativ hohe Artenanzahl auf. Zerstreut bis vereinzelt kommen noch Arten der mesotrophen Feuchtwiesen wie Kleiner Baldrian und Fieberklee vor.<br>Am Nordrand verläuft ein Graben, der die Fläche entwässert.<br>Bei der Bäumung des Grabens wurden große Fahrspuren in die Fläche gefahren. Als Pflegemaßnahme bietet sich die Mahd an. |   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |   |   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |  |  |   |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                         |  |   |   |   |   |   |   |   |   |   |   |   |
