| <b>Beschreibung / Besonderheiten</b><br>Brachfläche am Rande eines kleinparzelligen Wiesen-Forstgeländes unweit der Sudeniederung. Als Teil einer größeren Grünlandfläche wird es physiognomisch von Schilf und Großseggen bestimmt. Weitere Brachearten sind Sumpfreitgras, Flatterbinse und Rohrglanzgras, die faziesartig in die ausgedehnten Bestände der Landröhrichte und Seggenrieder eingetreten sind. Die Bodenwasserverhältnisse sind wechselfeucht, das Substrat mineralisch.                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                                                                                                                                                                                                                        |                  |   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |   |   |                                      |                                                                          |   |   |                                                                                                                                                                                             |                                                                                                                      |  |                          |                                                                                |                                                                                         |  |  |  |                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                        |  |                                                                                                                                                                                |  |  |  |  |                                                                                                                            |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |  |  |  |   |   |   |   |   |   |   |   |  |  |  |  |  |  |  |  |
