| <b>Beschreibung / Besonderheiten</b><br>Im sog. Großen Holz SW Mestlin stockt auf eutrophem, sehr feuchtem bis nassem und temporär überstautem, wenig gestörtem Torf ein Großseggen-Erlenbruch. Es handelt sich um einen mittelalten Schwarzerlen-Reinbestand, der sich in einer relativ schmalen Geländesenke durch den Laub-/Mischwald zieht. Eine ehemalige Niederwaldwirtschaft ist an den z.T. mehrstämmigen Bäumen erkennbar. Im Unterstand stehen jüngere Schwarz-Erlen und Eschen. Letztere bilden auch eine Strauchschicht. Die Krautschicht wird durch die Sumpf-Segge dominiert, dazu kommen Wasser-Schwertlilie, Sumpf-Labkraut, Sumpffarn, Bittersüßer Nachtschatten, Sumpf-Vergißmeinnicht u.a.. Auch sind größere Teile des Bodens (der ehemalige Gewässergrund) mit dem Wassermoos <i>Rhizocarpus fluitans</i> bedeckt. Eine aktuelle Gefährdung des Biotops ist nicht erkennbar. Es könnte der Sukzession überlassen werden, ansonsten ist eine angepasste Bewirtschaftung zu empfehlen. |                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                                                                                                              |   |                                                                                                                                                                                                                                                                                                                                                                                    |                                                |   |                                    |   |                                                                                                                                                                                                                                            |   |                                     |                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                        |   |   |                                                                                                                                                   |   |   |   |   |   |                                                                                                                                                                                                                                        |   |   |   |   |                                                                                                                                                                                                                                           |  |  |                                                                                                                                                   |  |  |  |                                                                                                                                                                                              |  |   |   |   |   |                                                                                                                                                                                                                                        |   |   |   |                                                                                                                                                   |                                                                                                                                                                                                                                          |   |   |   |                                                                                                                                                                                                                                          |  |  |  |  |  |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
